

DimFin UAEU

Official Friendly Guide • Version 1.4 (EU Release)

Money under control. Life — without spreadsheets.

Your personal financial assistant. Effortlessly track income and expenses, save towards your dreams in "Goals & Jars", keep debts under control, and comfortably end every month in the green.

Receipts, QR Codes & OCR

On-device offline receipt OCR (ML Kit), instant QR scanning, up to 6x zoom, and store tagging.

Biometrics, Flip-to-Hide & 100% Offline

Unlock with Fingerprint or Face Unlock. Mask all numbers instantly by flipping the phone face down.

Smart Budget Pulse & Radar

1–10 risk scale, daily safe spending limit, and one-tap actionable plan execution.

Goals & Jars + Commitments

New financial goals module, loans, recurring subscriptions, and private local reminders.

1. DimFin Philosophy & Quick Start

BASICS V1.4

Welcome to DimFin!

DimFin was designed to free you from tedious bookkeeping. You don't need complex Excel sheets or confusing accounting software anymore.

1 What is your name?

On first launch, enter your name. The app will greet you with a friendly "Good morning, John! ☀️" every day.

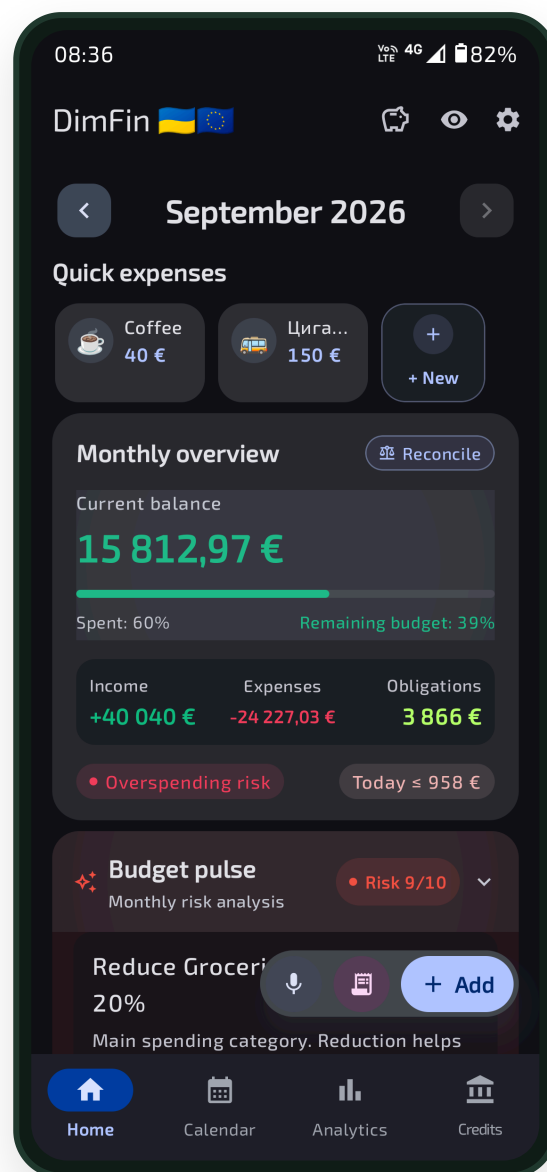

2 Currency & Language (EUR, USD, UAH, PLN)

In **Settings** (⚙️) choose your preferred currency (Euro €, US Dollar \$, Hryvnia ₴, Polish Złoty zł) and language: **English GB**, **Ukrainian UA**, or **Polish PL**.

3 Set baseline monthly budgets

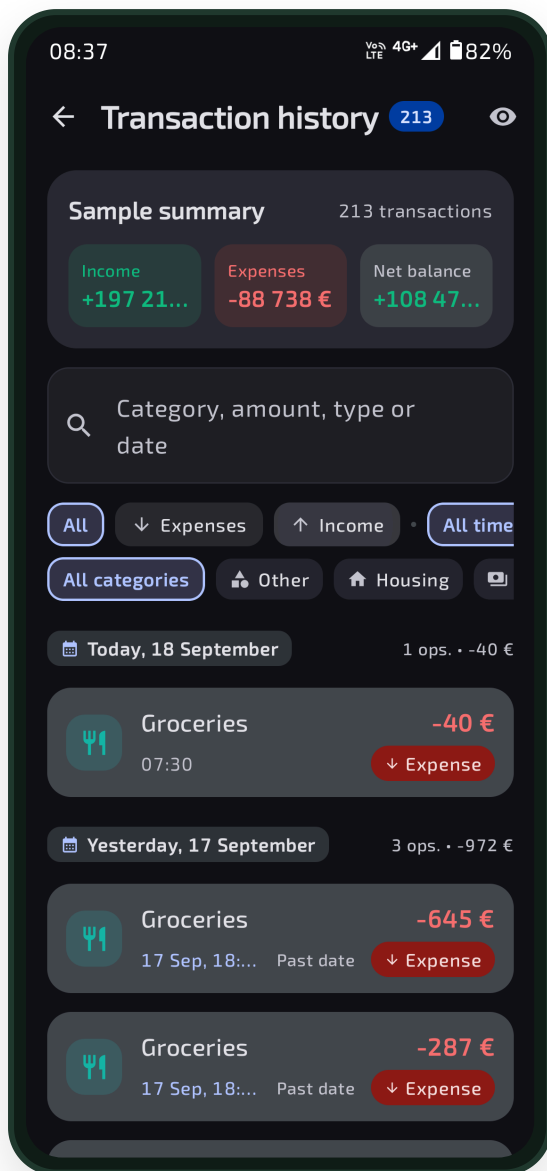

Set approximate limits for 3–4 key categories: Groceries, Utilities, Fuel, Shopping. This provides the baseline for smart analytics.

 **Golden Rule:** Don't try to configure everything on day one. Just log your daily spending — in 5–7 days DimFin will paint an accurate picture of your finances!

2. Receipts, Voice Input & Quick Expenses

FAST LOGGING

Receipts, QR Codes & OCR

Tap **"Add from receipt"** → snap a photo, scan a fiscal QR code, or pick a receipt from your gallery. Text is recognized completely on-device without internet!

Up to 6x Zoom: view full-screen receipts, pinch-to-zoom or double-tap to inspect every line item.

Store, Timestamp & Geolocation

Tag popular store chains (*Lidl, Biedronka, Carrefour, ALDI, Shell, ATB, Silpo...*), preserve exact timestamps, and optionally save purchase GPS coordinates.

Voice Input & 1-Tap Templates

Just say: *"Coffee 4"*, *"Taxi 15"* or *"Salary 2500"*, or tap pre-configured quick expense templates (Coffee, Transport) for instant 1-tap logging!

Pro Tip: You can attach or replace receipt photos at any time later directly from the transaction detail view!

3. Financial Radar & Smart Action Plan

ON-DEVICE INTELLIGENCE

How the Radar works in v1.4

The Radar continuously monitors your daily spending speed, remaining days in the month, and available balance. It shows an intuitive **risk level (from "Calm 1/10" to "Risk 9/10")**.

Safe Daily Spending Limit

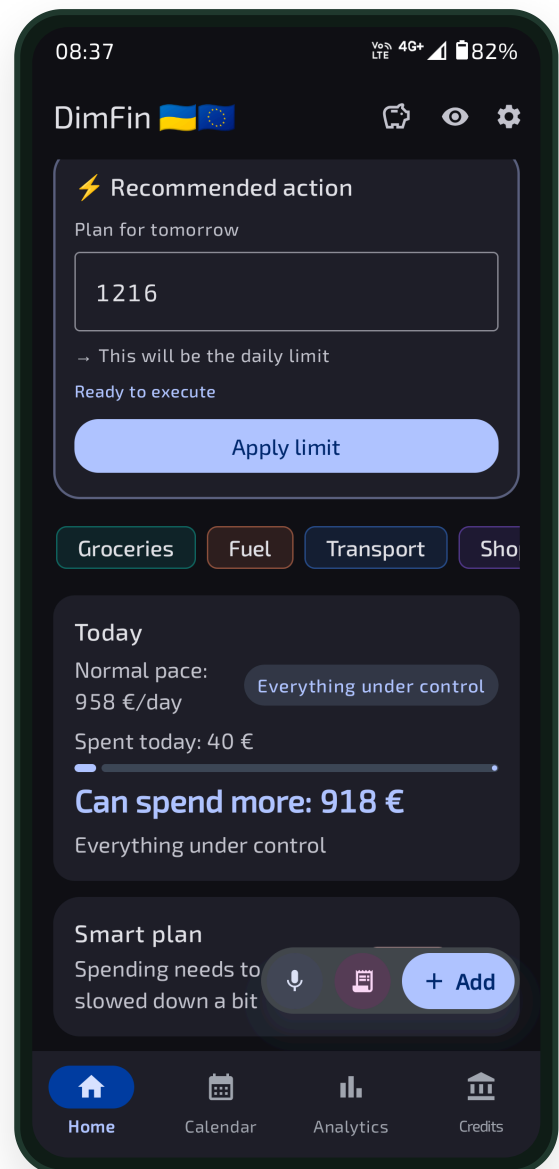

DimFin calculates how much you can comfortably spend each day to safely finish the month. Spent less today? Tomorrow's allowance automatically grows!

1-Tap "Apply Limit" Action

When an overspending risk is detected, the Radar suggests a clear solution:

- **Reduce spending pace:** adjusts daily limit for upcoming days.
- **[Apply Limit] button:** activates the target plan with an instant "[✓ Applied]" confirmation.

 **Remember:** The daily limit is a smart advisor, not a rigid warden. You are always in full control.

4. Calendar, Goals & Jars, and Commitments NEW FEATURE: GOALS & JARS

Expense Calendar

Color-coded day badges show your spending intensity at a glance:

-  **Green:** within budget.
-  **Yellow:** moderate spending.
-  **Red:** high spending day.

Tap any calendar day to inspect all receipts from that date.

Goals & Jars (v1.4)

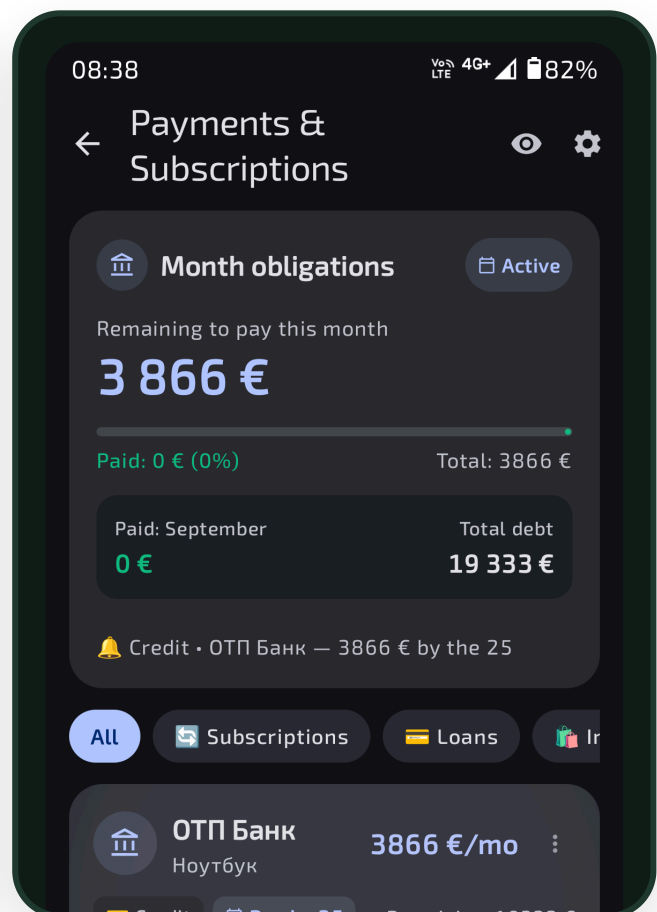

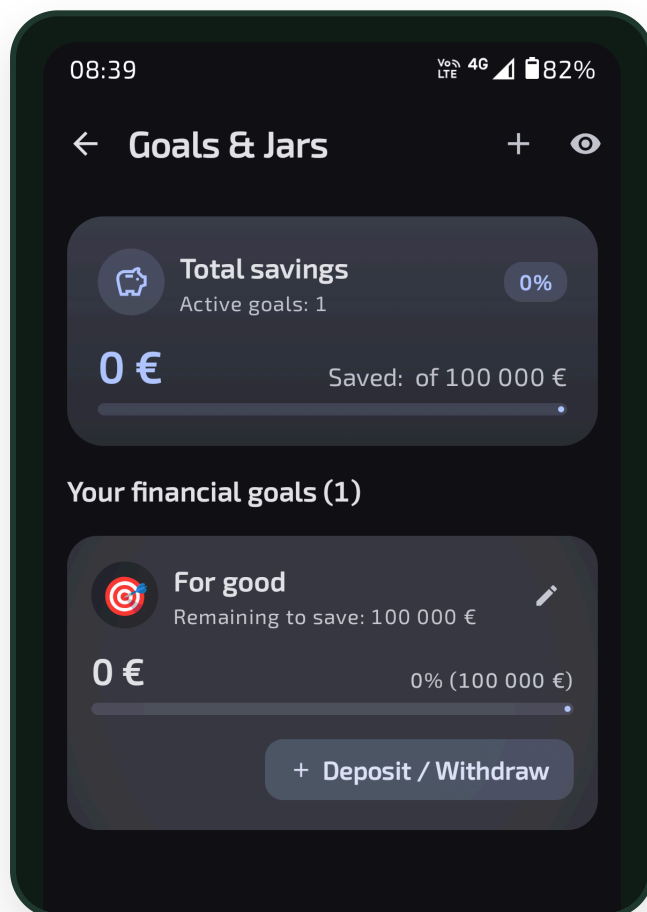

A dedicated place for your savings dreams:

- Create goals: "Vacation", "New Car", "Emergency Fund".
- Set targets and watch progress bar in %.
- Quick "Deposit" and "Withdraw" actions.

Loans & Subscriptions

Total peace of mind:

- Set monthly payment amounts and due dates.
- Get local reminders 3 days ahead and on the due date.
- Tap "Mark as paid" to watch your debt decrease.

5. Biometric Lock, Flip-to-Hide & FAQ

Biometrics & "Flip-to-Hide" Mode

- **Biometric Lock:** Face Unlock or Fingerprint protects your financial records every time you open the app.
- **Flip-to-Hide:** placing your phone face down instantly masks all monetary figures into secure dots (••••)!

Your Backups

Since DimFin does not store your records on any remote server, **make backing up a healthy habit:**

- Go to **Settings → Export Backup**.
- Backup packages **everything:** transactions with receipt images, loans, savings goals, and budgets into a safe JSON file.
- When moving to a new phone, simply tap "**Import Backup**".

Can I link bank accounts?

No, and that is our greatest advantage. No third-party or scammer can ever access your banking credentials.

Does DimFin support tablets & Foldables?

Yes! Version 1.4 features full large-screen optimization, multi-window Split-Screen, and free landscape rotation.

Developer & Support

DimFin was crafted with care by an independent software engineer from Ukraine for a calm, organized financial life.
